Trigger Assignments :
1.System.debug the following statements for any object
a)Trigger.New b) Trigger.Old c)Trigger.NewMap d)Trigger.oldMap

2.System.debug the following statements for all events (Before & After)
a)Trigger.New b) Trigger.Old c)Trigger.NewMap d)Trigger.oldMap

3.Write a Trigger on Opportunity which will create the clone record.
(Hint : Map trigger.new to clone record)

4. Campaign member Trigger
Whenever a Campaign member of type lead is inserted, check the RSVP field on campaign
member, if it is blank and if the Lead RSVP field has value we would need to update that value
on the Campaign member RSVP field.

5.Unable to Cross Ship
  1.Create SalesHeader__c object :(Having lookup to Account & Contact) & Add necessary fields.
  2. Create assignment record type on Case
        On Insert or update of a SalesHeader__c, if
        SalesHeader__c.Status__c = "Open"
        SalesHeader__c.Pick_Status__c = "Open"
        SalesHeader__c.Total_Amount__c > 300
        \\ Evaluate Bill to and Ship to fields to see if they match, if there is any difference, create a case
        IF (SalesHeader__c.Bill_to_Street__c <> SalesHeader__c.Ship_to_Street__c, OR
        SalesHeader__c.Bill_to_City__c <> SalesHeader__c.Ship_to_City__c; OR
        SalesHeader__c.Bill_to_Postal_Code__c <> SalesHeader__c.Ship_to_Postal_Code__c; OR
        SalesHeader__c.Bill_to_State__c <> SalesHeader__c.Ship_to_State__c)
        Then create a case with the following mappings

Case Field	Value
Account	SalesHeader__c.Bill_to_Customer__c
Contact	SalesHeader__c.Bill_to_Customer__c
Record Type	Assignmen
Origin	"Internal"
Owner	Unable to Cross Ship Queue
Reason	Unable to Cross Ship
Priority	Medium
Status	New
Subject	Account.Name + " " + Case.Type
Type	Unable to Cross Ship
Open_Sales_Order__c	SalesHeader__c.Id
Transaction_Status__c	EFT_Transaction_Status__c.Transaction_Status__c
Sales_Order_Number__c	SalesHeader__c.Name
Order_Date__c	EFT_Transaction_Status__c.Transaction_Date__c
